MARINE, OFFSHORE & DEFENCE REPAIR SPECIALIST

ABOUT US

UK Docks Marine Services provide Technical Ship Management and Ship Repair Services within both the Commercial and Defence sectors, operating throughout the UK and internationally. Our ship management capabilities include global through-life vessel support, coordinated via our UK support hub and head office in Tyneside. This is further enhanced by our strategically located facilities across the UK, and a global support network. We offer project and program management, including technical consultancy for ship maintenance, repairs, modifications, additions, and alterations. Our flexible and agile commercial supply chain is underpinned by robust management procedures, informed by over 30 years of industry experience.

OUR FACILITIES

Our UK based facilities include; management offices, extensive warehousing and storage facilities, ship repair yard with four dry docks, fully equipped workshops, afloat repair berths and specialist boat repair facilities. We also employ and deploy specialist project management teams and service engineers to support the marine, offshore and the Defence sector throughout the world.

OUR SERVICES

- Vessel maintenance, repair and refit
- In-service support
- Vessel upgrades and modifications
- Vessel conversions
- Ship life extension programs
- Technical and logistical support
- Comprehensive data management services

SHIP REPAIR

Located in North East England, our ship repair facility delivers world-class repair, conversion, and fabrication services to clients across the maritime and defence sectors.

DRY DOCKS & REPAIR BERTHS
