IDEAL LOCATION

Vancouver Drydock's state-of-the-art facilities are located on the north shore of Canada's largest port, steps from the Shipyards District: a thriving community hub home to hotels, restaurants, and entertainment. We are conveniently located near transit, with the nearby Seabus allowing for easy access to downtown Vancouver and the Vancouver International Airport.

And, we are strategically positioned on the west coast of North America and we are the only large shipyard and drydocking facility between Vancouver, BC and Alaska.

DRYDOCK EXPANSION

To better serve our customers across the Pacific Northwest, we're making investments to upgrade and expand our ship repair and maintenance operations.

We recently received approval from the Vancouver Fraser Port Authority to extend our water lot and add two new smaller floating drydocks and a work pontoon to our existing operations.

The drydock expansion is expected to be complete by late 2024 and will increase our capacity for ship repair projects by about 30 percent, allowing us to service additional vessels.

SEASPAN'S VANCOUVER DRYDOCK

TRUSTED VESSEL MAINTENANCE & REPAIR

For more than a century, Seaspan has been committed to the delivery of first-class marine solutions. With a growing reputation as a centre of excellence in ship repair, conversion, and service, we play an integral role in supporting the vessels that serve Vancouver and the Pacific Northwest.

WHO WE ARE

Vancouver Drydock is a full-service marine vessel service and repair facility with an international reputation for quality, on-time delivery, flexibility and outstanding customer service.

Our combination of knowledge and experience, specialized skills and infrastructure, and commitment to customer satisfaction has created an environment that produces reliable results in a timely fashion.

EXPERTISE AND EXCEPTIONAL SERVICE

We complete maintenance, repair and refit on a wide range of vessels including small tugs, barges, ferries, large freighters, Coast Guard vessels, yachts, and cruise ships.

No matter the challenge, our skilled team of over 200 is ready to provide a customized solution to meet your needs.

Our full range of services include engineering, tail shaft repairs and fabrication, steel fabrication and repairs, diesel engine servicing, ballast water treatment installation, hull cleaning and painting and outfitting services. We utilize green technology such as robotic crawlers with ultra-high pressure (UHP) water to remove paint on the underwater hull with no waste.

Our Health, Safety, Environment and Quality (HSEQ) management systems meet and exceed industry standards, ensuring your project is completed safely and to the highest possible quality.

OUR FACILITIES

We bring together exceptional infrastructure, technology and skilled trades workers.

Our facilities include:

- Two Lloyd's Register classed floating drydocks, both with 30,000-tonne lifting capacity:
 - Panamax* — 202m long x 46m wide between wing walls
 - Careen* — 140m long x 34m wide between wing walls
- 210m pier with 10.5m water depth, fully serviced by an 35-tonne crane, and a 15-tonne crane servicing the Panamax drydock
- On-site heavy machine shop with two 40-tonne overhead cranes and lathes capable of handling shafts up to 18 metres (50 feet)
- On-site water treatment plant
- Expertise, project management and technical support
