VANCOUVER DRYDOCK

NORTH VANCOUVER, B.C., CANADA

Seaspan's Vancouver Drydock operates within the third largest seaport in the Americas by tonnage making it ideally located to provide timely repair, upgrade and maintenance services to the hundreds of large ocean-going vessels which transit the port of Vancouver on an annual basis, among other commercial and public customers.

Established over 120 years ago, Vancouver Drydock is the largest and most experienced ship repair facility in Vancouver and executes approximately 50 vessel repair projects a year.
