

# Master Divers Our Area of Expertise

Delivering Innovative, Reliable Solutions to support the Energy, Water,  
Port and Shipping Sectors

## Mr. Ariyaseela Wickramanayake

Founder & CEO – Master Divers  
& WA Tucker

Since my initial vision and inception in 1978, Master Divers has grown from strength to strength to lead the way in the delivery of projects and services in support of Energy, Water, Port and Shipping Sectors.

At Master Divers, we believe that high-quality governance goes beyond pure compliance, that it creates long-term value for our shareholders, employees, clients and creditors this building long-term, trusting relationships.

During the last four decades Master Divers has grown primarily because we have worked hard to listened to our clients, the international market, and our own people. We have redefined our business strategy to focus on core services and we have articulated the values that the company stands for—what we call our Aspirations.

We've reshaped our business around this strategy and our core values, being internationally recognised and locally differentiated.

## MISSION STATEMENT

To continue to lead the way Delivering Innovative, Reliable Solutions to support the Energy, Water, Port and Shipping Sectors in Sri Lanka and South Asia and beyond the coming decades.

## CORE VALUES

Master Divers strive to remain one step ahead of our competitors at all times, to uphold our reputation as one of the most experienced, professional and innovative marine and subsea services provider companies operating in Sri Lanka who pride ourselves on our Core Values.

### ✓ ETHICS AND INTEGRITY

our philosophy is based upon ethical conduct, mutual trust and fostering partnering relationships whilst undertaking our daily business with clients, partners and employees.

### ✓ INNOVATION

we constantly strive to improve the efficiency of our business by investing in new technology and innovative software and management processes. Safety of our employees and our clients, their assets and the environment is our prime concern.

### ✓ PERSONAL DEVELOPMENT

promoting professional development of our people through ongoing training of our personnel.

Our Core Values describe what is most important to us going forward as we conduct our business, the way we behave with our employees, clients, partner's and suppliers. We are proud of the work we have done and look forward too many successful years ahead.

# About Us

## MARINE & SUBSEA PROFESSIONALS SINCE 1978

Master Divers is a leading Marine & Subsea company providing specialist services in support of the local and regional Energy, Water, Port and Shipping Sectors.

## WHAT SETS MASTER DIVERS APART?

- Everything we do takes place around the water, and as a result we have the right people, equipment, and procedures necessary to mitigate associated risks.
- We provide services both above and below the waterline, enabling us to self-perform inspection construction and repair services on the entire structure or vessel
- We specialize in finding innovative solutions using latest technology and software that increases safety for our personnel, the efficiency and quality of our services, translating into added value being delivered to our clients
- Our fleet of well-maintained marine equipment is the largest of its kind locally that provides safe working platforms.
- We can offer both portable equipment for remote provides safe working platforms worksites.

# Our Goal

At Master Divers we strive to provide services that deliver maximum quality and value to our ever-growing Client list successfully completing their projects or services provided safely, on time and within budget.

# Certification

Master Divers is committed to ensuring that we continuously evolve to meet our vision, our business management system quality is certified to ISO 9001:2018 and complies with all applicable laws and regulations in the countries where we operate.

Master Divers shall be proactive and challenge ourselves, our customers and our partners to 'make a difference' by delivering competitive and value adding solutions always in the safest manner possible, given the assessment of the activity to be undertaken.

Master Divers is proud to be fully accredited and holding valid certification from the following classification bodies.

# Delivering Innovative, Reliable Solutions to support the Energy, Water, Port and Shipping Sectors

Historically inspection in the region was being undertaken by divers with the normal process of preparing report being some verbiage, a series video clips or images within the report.

Master Divers is proposing to disrupt outdated industry processes by replacing them with cutting-edge technology that supports you and your business in cutting costs, overheads, time, and improved quality of deliverables and workflow.

Master Divers has heightened its capability by partnering with international companies to provide infrastructure inspection, assessment, and monitoring and asset management by utilising state of the art robotics and innovative bespoke software to undertake cost effective, safe, accurate data acquisition and client specified deliverables enabling information-driven solutions.

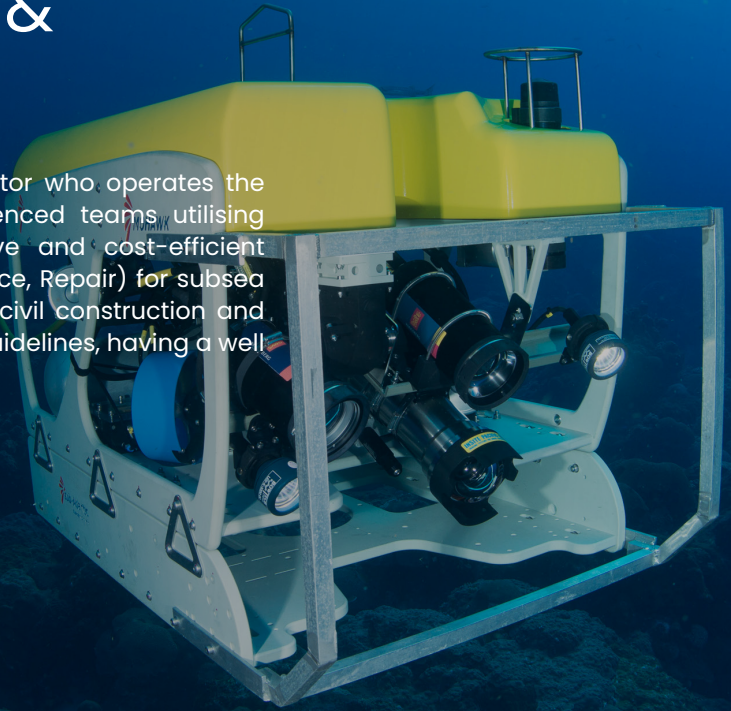

## AREAS OF OPERATION

- Energy (Oil & Gas, Power Electric & Coal)
- Dams (Hydro Electric & Water)
- Ports & Harbours
- Marine Engineering
- Shipping (UWILD, Hull & Propeller Cleaning)

# Inspection Diving & ROV

Master Divers is an independent subsea contractor who operates the inshore and nearshore market, our well experienced teams utilising latest technology and software deliver effective and cost-efficient solutions in support of IMR (Inspection, Maintenance, Repair) for subsea infrastructures and assets to installation during civil construction and salvage that meet international regulations and guidelines, having a well proven track record in:

- Pipelines
- CBMs's and Mooring Configuration
- Hydro Power Dams
- Vessels (UWILD)
- Bridges
- Intakes and outfalls
- Piers and dock facilities

## Our Divers Know Dams

Master Divers is the local leader in underwater inspection of dams and hydro-electric facilities our personnel are well experienced, with the knowledge necessary to perform a thorough underwater inspection and very familiar with dam structures in the region.

During the inspection, the dive team maps and photographs deterioration, cracking, and other defects according to client requirements.

Our ROV's systems configured with an HD video camera, sonar mapping system, other tools coupled with state-of-the-art data analytics provide a safer, easier and more comprehensive underwater inspection, to support the right asset management decisions.

## Underwater Inspection in Lieu of Drydocking (UWILD)

Master Divers is approved by all leading Class Societies to undertake underwater inspections and surveys. We undertake a broad scope of inspection requirements in lieu of drydocking (UWILD) services.

We use either Divers or the latest ROV, imaging, cleaning, and tooling technologies to deliver safer, more cost-effective subsea inspections for all types of assets. We manage the entire UWILD and inspection process, from planning and execution to the final report

# Hull Cleaning & Propeller Polishing Services

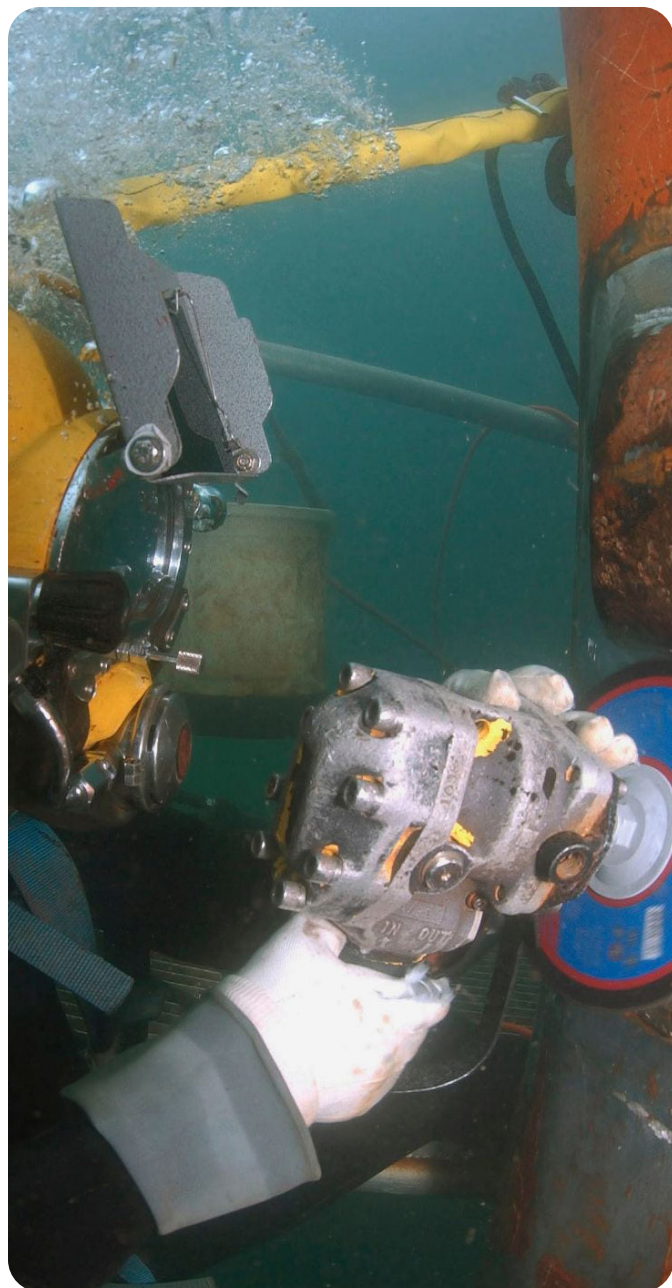

Master Divers has a well proven track record undertaking Hull Cleaning & Propeller Polishing of vessels of all sizes.

At Master Divers we believe in the combination of Divers and ROV's operating side by side with partner's fully in-house developed technology, we deliver environmentally friendly underwater hull cleaning, inspection and propeller polishing services – compliant with the International Maritime Organization (IMO) and Marine Environment Protection Committee's (MEPC) Guidelines – for biofouling control and management, enables us to execute underwater inspection services to the highest standards.

We are constantly changing and improving the old-fashioned ways in which underwater maintenance services are being performed. In line with this mindset, we have developed a highly innovative Twin-disc Propeller polishing tool that is currently being used by underwater service providers around the globe.

What sets us apart from most companies that provide propeller polishing services is that we offer a 3-stage polishing method.

This means that we actually polish the propeller 3 times in order to achieve the highest grade on the Rubert scale namely Grade 'A'.

## Detailed Reporting

At Master Divers, we understand that an inspection is only as good as the end deliverables. Master Divers can inspect, acquire, and effectively report critical information on your assets.

Our reports contain detailed information, drawings, images, and underwater video clips to comply with your contract specified deliverables.

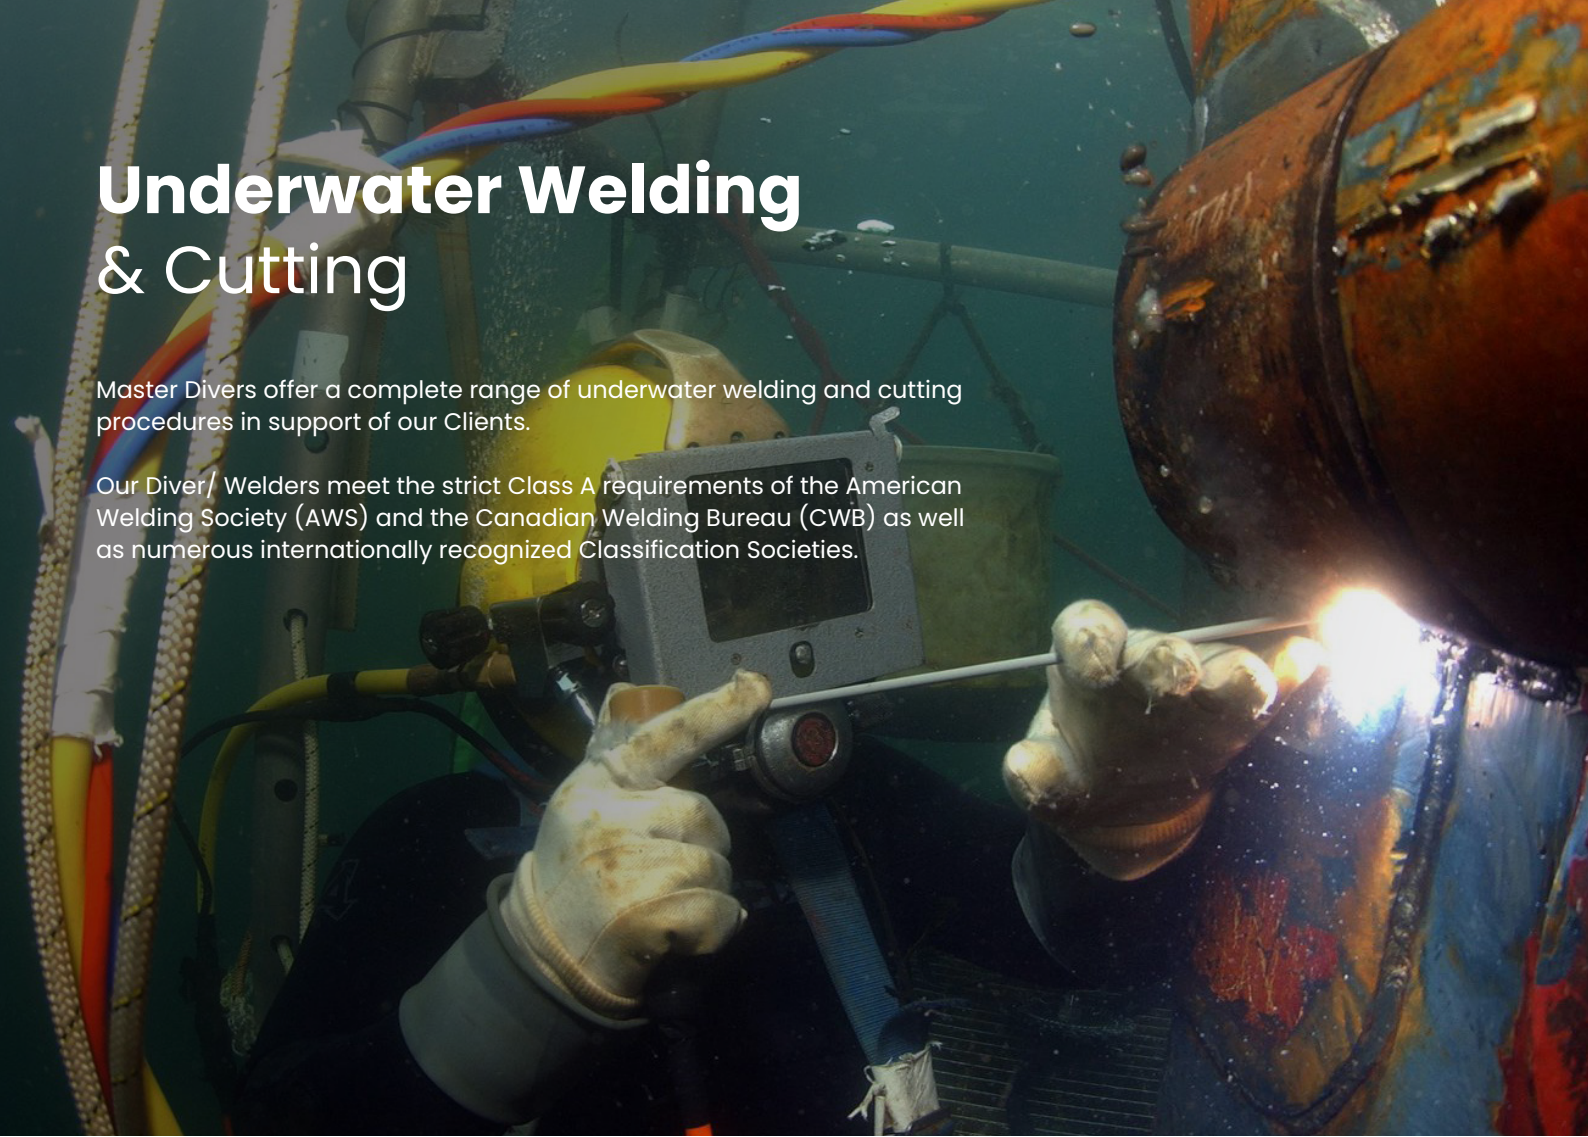

# Underwater Welding & Cutting

Master Divers offer a complete range of underwater welding and cutting procedures in support of our Clients.

Our Diver/ Welders meet the strict Class A requirements of the American Welding Society (AWS) and the Canadian Welding Bureau (CWB) as well as numerous internationally recognized Classification Societies.

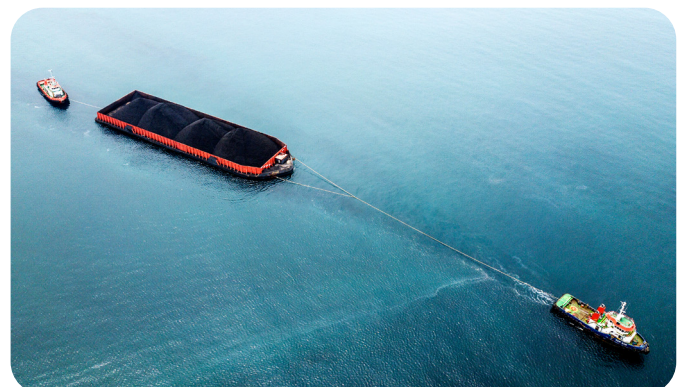

## Personnel & Materials Transfer

Our fleet of vessels with AC and Non-AC cabins provide fast and safe transportation of your personnel and ensuring safe handling and delivery of cargo.

## Vessel & Barge Chartering

Whether it's from our own fleet or using the extensive network of vessel brokers and owners, Master Divers door to door chartering and flexible schedules make us your perfect partner.

# Rock Blasting

Master Divers is the leading rock blasting contractor servicing the nearshore areas of Sri Lanka, having extensive local knowledge and understanding of the techniques and methodologies required to maximize productivity and fragmentation.

Our project managers are well versed in advanced techniques and blast design and can adapt those designs to meet your unique specifications.

Master Divers owns two self-elevating maritime platforms, capable of working in the open sea in exposed areas, which are fully equipped with integrated drilling units.

The inhouse developed procedures and methodology for drilling and rock blasting, are based on local experience and industry-best practices, this ensures the rocky substratum is successfully.

Our personnel employed on the work barges are specially trained in specific safety measures concerning the handling of explosives resulting in minimal impact to the environment.

# Salvage & Towage

Consortium Master Divers Salvage Tugs Services is an independently owned company providing a wide range of marine support services from towage, salvage and civil engineering support to ships agency and pilotage.

With over 40 years' experience and service in the marine sector having built up an enviable reputation for excellent care and long-term customer relationships.

Our fleet of versatile multi-purpose tugs assist in gas tanker mooring operations, anchor handling and support of civil engineering & construction projects requiring shallow draft, coastal vessels.

Our qualified marine crews have vast experience in all aspects of salvage and towing operations.

We are proud of the high-quality support services to the marine and civil industry 24 hours a day, 365 days a year.

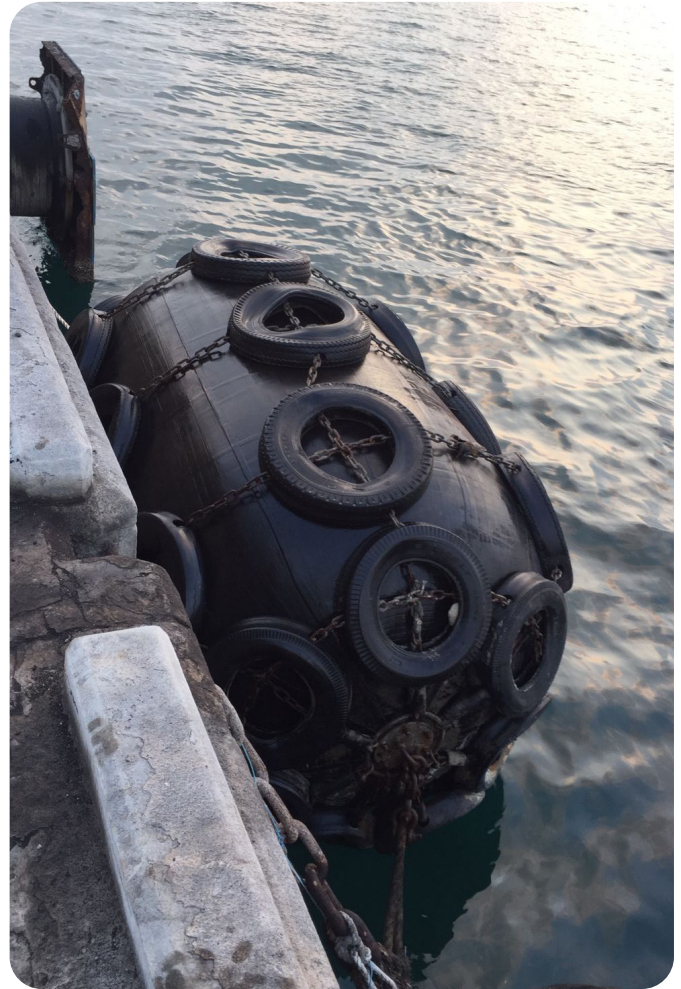

# Floating Fenders Services

Floating fenders are ideal for short-term port calls or one-off berthing's, interim fendering during construction or maintenance work, transfer of cargoes at sea, buoyancy aids, providing vessel stand-off and double berthing requirements.

Master Divers provides floating fender rental, repair and refurbishment services, that ensures an end-to-end support for your requirements. We deliver and install floating foam or pneumatic fenders within days to any location in Sri Lanka.

Rental is highly cost-effective solution for temporary applications and with Master Divers you get a fender rental service second to none.

Master Divers and our partners competitive strength lies in its ability to provide the right solution to solve our client's requirements, to support our operations, Master Divers has large office facility and marine base located in Colombo.

## Resources

Our continual investment in technology, equipment and fleet reinforces our long-term commitment to this business – and we continually seek other opportunities to further enhance our portfolio.

Master Divers and our partners competitive strength lies in its ability to provide the right solution to solve our Client's requirements.

To support our operations, Master Divers has large office facility and marine base located in Colombo.

Our people are one of the bedrocks of our organisation, we place high value on our relationship with our employees and strive to encourage them to reach their full potential.

No matter what their area of skill, all our employees are specialists in their particular field of expertise.

Master Divers and our partners own and operate a fleet of vessels, Diving and ROV systems, associated equipment and bespoke software which can be complimented from specialist third party rental companies.

# Milestones History

Since our inception in 1978 Master Divers have undertaken numerous projects and supporting both local and international companies these include but not limited to:

- Installation of SPM and pipeline including longstanding maintenance support for Ceylon Petroleum Corporation
- Gas tanker mooring operations a joint operation and longstanding contract with Litro Gas Terminal Lanka Limited
- Decommissioning and recovery subsea petroleum pipe line on behalf of Ceylon Petroleum Cooperation
- Installation of subsea fibreoptic telecom cables (Falcon segment 9.2) in support of Alcatel-Lucent
- Installation of HDDP pipe line on behalf of Lakdhananvi Power Station, Kerawalapityya.
- Salvage Operations MV LEEROOT
- Removal of burnt and damaged cargo from MSC Daniela Operation prior to obtaining permission to dry dock

# Ship Repairs & Maintenance

Our sister company W.A. Tucker & Co. Marine Engineers is a well-established marine repair, maintenance and conversion company providing the full range of ship repair and maintenance services in Sri Lanka for vessels calling at all ports in the country.

We operate at all ports in Sri Lanka, providing services both inside port and at anchorage.

Our highly qualified and experienced Marine Engineers, skilled electricians, fitters & certified welders, are well experienced in ship repair, steel work modifications and maintenance and this enabling us to undertake, ship repairs and maintenance at very short notice to meet the owner's tight schedules.

Our Clients know their assets and machinery are in the safest professional hands.

# Clients

Master Divers has a well proven track record supporting our ever-growing client base in the Energy, Water, Port and Shipping Sectors.

Our extensive client list includes:

# Partners
