EXCELLENCE IN MARINE
SERVICING, REPAIR AND
PROPULSION EQUIPMENT.

www.stonemarineservices.com

Stone Marine Services was founded in 1999 in the UK and has expanded to include additional sites in Africa as well as forming exclusive partnerships worldwide. From our head office in Scotland, we provide clients in the maritime industry with a comprehensive service, repair and spares package.

Expertise and Dedication - Worldwide, 24/7

Commercial, Naval, Leisure or Offshore - We offer an extensive range of services for the maritime industry. As a recognised independent propulsion repair specialist, we provide a wealth of experience in the servicing and repair of most propulsion and marine equipment types, warranted and supported by our engineering specialists and our principal agents.

Committed to Excellence

Our success stems from our ongoing commitment to being the partner of choice for those who demand excellence and highest level of service.

We invest in our employees.

We are committed to maintaining the highest standards in occupational health and safety throughout all our processes, with continued investment in our staff, products and equipment. Our service engineers and workshop technicians are trained and certified by our OEM principals.

We continually improve the quality of our processes and services.

Stone Marine Services is a corporate member of The Royal Institution of Naval Architects (RINA) and ISO 9001:2015 accredited, ensuring quality standards are maintained throughout. All work is guaranteed under our warranty provision.

20 YEARS
1999-2019

MOVING FORWARD

Our Services

Project Management

Stone Marine Services have a wealth of experience in project management. Our project teams partner with key service providers worldwide to deliver turnkey solutions on budget and on plan.

Thruster Service – In or Out of the Water

Dry dock repairs are increasingly costly and time consuming. To minimise operational disruption and vessel downtime, we provide our customers with a single source solution for thruster service – in or out of the water.

Shipyard Cooperation Agreements

We work in close partnership with shipyards across the world to ensure vessel repair and maintenance is coordinated and managed effectively with the necessary support and resources in place.

Planned Service Agreement (PSA)

Minimise the risk of unexpected repair costs and vessel downtime. Built around your vessel's equipment and performance requirements, our customised solution for planned maintenance is a sound investment with operational and financial benefits through fixed price planning.

Propulsion Equipment

Regardless of location or vessel, we can provide spare parts, repair and maintenance on all types of propulsion and associated equipment to ensure optimum performance.

Controllable Pitch Propellers, Blade Repairs, Portable Deck Mounted Propulsion Units, Bow Thruster, Z- Drive Azimuth Thrusters, Rim Thrusters, Retractable Thrusters, Tunnel Thrusters, Pump Jet and Water Jet Units, Power Takeoff Shafting, Clutches, Oil Distribution Boxes, Couplings and Dampers Gearbox Repair.

Spare Parts

Eliminating unnecessary downtime; we offer procurement and logistics for OEM spares and, where necessary, we can provide alternative solutions to minimise delays to ensure that your equipment needs are met on demand and supported worldwide.

Steering Gear & Rudder

Keeping you on course; we are specialised in the repair and service of Steering Gear and Rudders, ensuring critical assets are maintained and serviced, saving you time and money.

Deck Machinery

With a heritage spanning over 165 years, we are the Original Equipment Manufacturer (OEM) for Thomas Reid Deck Machinery, widely used on merchant and naval vessels. We also represent other specialist OEM's.

Stern Tube Seal Equipment

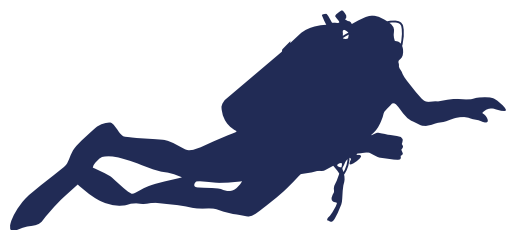

Keeping your fleet running; a leaking seal can create problems in many ways: pollution, water ingress and propeller failure. Trained in stern tube seal servicing and repair, our team of engineers can provide expert service and advice.

Our work is guaranteed in accordance with OEM recommendations and requirements.

Propeller Stern Tube Sealing Arrangements and Air Seal Systems upgrades are available on request.

Control Systems

Control Systems are the essence of any vessel. Our highly skilled field service engineers are experts in the repair, maintenance, setting, diagnosis, commissioning and upgrade of manoeuvring and positioning systems.

Engineering Workshop Facilities

Located in the UK and Africa, our comprehensive workshop facilities provide the base for our engineers to carry out the repair and overhaul of critical marine assets. With skilled engineers employed at each of our sites, we can carry out testing, research, machining, repair and overhaul of equipment to ensure long term reliability.

Features

- Overhead Crane capacity up to 50t and 9.0m below hook
- PCN Accredited Non Destructive Testing MPI & LPI
- Lloyds coded weld repair specialists
- HYTORC Equipment
- Induction Bearing Heaters
- Cutting and Lapping Services
- A range of Calibrated Measuring Equipment ...and much more

Storage

Stone Marine Services have the expertise and facilities to store and maintain consignment stock and other essential equipment to OEM recommended standards. Fully insured and with transportation assistance, our comprehensive storage and maintenance solutions optimise the lifespan and availability of your assets.

Did You Know?

Our equipment and workshops are available to rent. This can be combined with tooling and consumable supply along with certified labour assistance. For more information, please get in contact.
