## ENGINEERED SOLUTIONS

Our experienced team of marine engineers can manage all stages of the project from preparation, logistics, acceptance and operational execution on behalf of customers across the globe.

Our services include;

### Azimuthing Thruster Extraction

Repair & Maintenance to support an exchange programme – Offshore.

### Tunnel Thruster Extraction

Repair & Maintenance to support an exchange programme – Offshore.

## EXPERTISE

Subsea Global Solutions has worked with many oil and gas operators to successfully execute on the exchange and repair of their main propulsion in the Gulf of Mexico, Mediterranean and Asian markets.

The scope of projects has been varied across a range of clients.

### DIAMOND OFFSHORE: OCEAN GREAT WHITE

Work scope: To remove a Thruster which had failed. The semi-submersible was situated in a deep water sea loch off the coast of Scotland. The unit was stripped, examined and is currently being overhauled by Stone Marine Services. The project was successfully delivered with a significant saving to the client.

### NOBLE JIM DAY

Tasked with working on a technically advanced fleet of Noble vessels (cold stacked). The project scope included the removal and storage of 8 X 355 RR units. **Completed on time and under budget.**

### DIAMOND OFFSHORE: OCEAN BLACKHAWK, BLACKHORNET AND BLACKLION

Project scope included the removal and replacement of Thrusters. The project was completed on time and to plan delivering significant savings for the client.
