

The Maritime Marketplace

Maritime Catering 4.0

Complex administration devours budget and wastes valuable time of catering departments.

Digitization of the process directly puts you ahead of the market and makes you an innovation leader for maritime catering.

UNIQUE BENEFITS FOR CATERING COMPANIES!

MESH optimizes maritime catering by increasing efficiency and focusing on the core business. Operational activities are digitally automated and save time using the globally unique algorithm.

The concept is cost-neutral and works offline on board without technical installation.

Smart & innovative catering

MESH is digital and cost-effective catering with even higher quality while increasing the mental well-being on board.

The budget and consumption monitoring guarantees catering companies **risk-free use** and **full reliability** globally at any time.

Item name	Quantity	Price	Total
...

The interactive and easy-to-use order form focuses on budget as well as consumption and all nutritional values. It is convenient for all vessel types and sizes as well as all different nationalities.

The platform digitalizes the entire maritime supply chain from A-Z. You can include your worldwide supplier network and global price data. The finished order comes from board and can directly be sent to your partners: **no order cuttings, no discussions, just a smooth process.**

By using our concept, your vessels will get the **same amount of food** even with rate adjustments - always and everywhere. There is no more over or under consumption and you can share this benefit with your customers to set yourself apart from the competition. **#crewelfare**

MESH offers a new concept for catering companies of their **individualized und customized platform** with your own company logo and order domain - **without any effort or costs.**
